

HART Railroad — Session 2 Operating Board

Active fleet: 60 cars · In-train (picked up): 9 · In-station: 51 · Conflicts: 0 · Generated Mon Jul 13, 2026 8:39 PM

Placement: **IN-TRAIN** = picked up / on a consist (no station). **IN-STATION** = sitting at a yard or industry spot.
Session 2 action = the car's switch-list assignment (job + phase) at session open. **Next step** is derived from stock STS database status (waybill + shipment), not the switch list. A **conflict** means the switch-list assignment disagrees with the live database.

Car	Type	Status	Placement	Waybill	Shipment	Route (load → deliver)	Session 2 action	Next step (from DB)	Conflict
